

A large array of solar panels is shown in a field, tilted towards the sun. The sun is bright and creates a lens flare effect in the sky. The background shows a clear blue sky with some clouds and a distant horizon with green hills.

COMPANY INTRODUCTION

Makram Barakat EST. was established in 2008. It is a high-tec enterprise and specialized in integration of the photovoltaic generation system. **Makram Barakat EST.** is a national leader in clean energy services. We make clean energy available to homeowners, businesses, schools, non-profits and government organizations at a lower cost than they pay for energy generated by burning fossil fuels like coal, oil and natural gas. Our approach is to install systems to the highest engineering standards while making the switch simple for our customers. We have revolutionalized the way energy is delivered by giving customers a cleaner more affordable alternative to their monthly utility bill. We call this better energy.

Our Mission:

We are designing a reliable world-class brand which relieves our clients from high energy costs, thus providing them with reliable high quality systems, as well as trustworthy low energy consumption and the highest service standards.

Scope of Business

1. Manufacturing
